THREATENED INSURRECTION IN MEXICO.

Deming, N. M., Dec. 17 .- News come the Yaqui Indians and ignorant Mexicans. The Indians are reported to be abandoning their homes in the northern part of the State and taking refuge with their families in a stronghold in the Sierra Madre The source of the trouble is the natural sympathy of these Indians for their neighbors, the Temochians, who were recently swept out of existence by the troops of the Government, and the fear of a like fate for themselves. This discontent has been increased by the removal of the Yaquis from their rich lands and farms along the banks of the Yaqui River. The feeling against the Government has young girl named Anita, whom they worship, and who urges them to revolt against Diaz as the only means of salvation. It is estimated that there are nearly 300 indians in the stronghold and as many in the surrounding mountains. The official newspaper of the city of Chihuahua says that more than Mexican troops, under command of General Jose Rangil, will march to the scene of trouble just as soon as the mountain roads are passable and endeavor to crush the rebellion. The Yaquis have determined upon early spring as the time for the outbreak and are concentrating forces and providing supplies toward that end. More than 200 ignorant Mexicans are reported to have joined the rebel Yaquis.

The compartment bore signs of a struggle. The heads of the victims had been battered in and blood covered the seats and stood in pools on the floor. The me chants had evidently made a determined light for their lives. Eighty thousand roubles which they had in their possession were missing, showing that the object of the crime had been robbery. BALTIMORE, WASHINGTON,

TO HAVE ALSO AN EDUCATIONAL SIDE-FIVE OF THEM ORGANIZING.

The members of the City Club have always recognized the fact that 1,000, even if wealthy and influential, could not alone secure much improvement in municipal government. One of the first thoughts of the organization, therefore, was the forming of allted associations to which men of every station in life should be welcome. An active campaign is under way for the establishment of five such affiliated bodies. e will be much more than political organizations. Profiting by the examples of workingmen's clubs in England, the committee on affiliated clubs of the parent body has laid out lines of usefulness for the

proposed organizations which will make them im-

portant educational and moral factors in the com-

It has been decided that five Good Government clubs, as they are to be called, will be enough to begin with. Perhaps in a decade the movement to divorce municipal from National politics will have reached a stage which will give nearly every Assembly district such an organization. These first five clubs are to be named A, B, C, D and E. The membership of one will be drawn from the XXIst Assembly Dis-trict and those east of it, that is, from the area between Seventh-ave, and the East River and Fortysecond and Eighty-sixth sts. A second Good Govern ment Club will draw its men from the XXIIId and the neighboring districts to the north of it, or from the west side of the city, north of Seventy-second-st. area between Seventh-ave, and the Hudson River and Fortieth and Seventy-second sts, will support a third club, and that between Fourth-ave, and the Hudson River and south of Fortieth-st. a fourth Little will be done south of Bleecker-st, for awhile,

The City Club liself will not promote the formation of such organizations, preferring to have workingmen cellar. The loss is estimated at \$10,000, on some of the City Club's members are enlisting the aid of such men in the establishment of these associations and it is hoped that all five of them will open their doors within a year. The initiation fees will be \$1 and the dues 50 cents

a month. Wealthy members and those of moderate means will pay the same, so that all will feel on an equality in the clubbouse. The rich men will use the house only for political meetings, conferences, etc.; the others, as a regular club. In the hall for meetetc., could be given. In London it has been shown that if the amusement fund which the workmen now dissipate in harrooms were spent in a clubhouse the enterprise would be self-supporting. Each Good Government Club will in addition receive dues from perhaps 1,000 men of wealth who would visit it only to A fund would be needed to furnish the clubb

This would be provided by a loan of perhaps \$10,000. it is thought that this plan would make the members feel more manly and independent than if the feel more manly and independent than if the sum were given outright by a few persons. Even the power might subscribe \$5 or \$10 to this loan. Several rich men have declared their willingness to loan considerable amounts to these chets. The rent for the two houses needed by each organization is estimated at \$5,000, and might be much less. The cellars would be used for howling alleys and a gymnasium; the ground floor for a restaurant for members and their wives; the second for billiard and reading rooms, and amother for a place of meeting. Women would be admitted to one of the reading rooms.

Such clubs might each have 1,500 members and have enrolled the names of several thousand other
